

5 Basic Types of AI Chat Prompts

1. Instruction Prompt

Tells the AI exactly what to do.

Example: “Write a thank-you note for a teacher.”

Why it’s useful: It’s clear and direct—great for beginners.

2. Question Prompt

Asks the AI a question to get information or ideas.

Example: “What are some fun team-building activities?”

Why it’s useful: Encourages curiosity and learning.

3. Role Prompt

Asks the AI to act like someone else.

Example: “Pretend you’re a career coach. How would you help someone switch jobs?”

Why it’s useful: Helps simulate expert advice or different perspectives.

4. Refinement Prompt

Builds on a previous answer to improve or adjust it.

Example: “Make that email more formal.”

Why it’s useful: Encourages iteration and better results.

5. Creative Prompt

Inspires the AI to generate stories, poems, or ideas.

Example: “Write a short story about a robot who learns to paint.”

Why it’s useful: Sparks imagination and fun.
